EnjoyEvents – Smart Event Booking & Management App

A professional UI/UX mobile app project designed to simplify event discovery, ticket booking, and event management — built with Figma and crafted by a dedicated team of six.

Made with GAMMA

Project Overview

A mobile application that simplifies event discovery and ticket booking. Users can browse events by categories, view details, book tickets, and track bookings.

Community

Local gatherings and neighborhood events

Sports

Live matches and athletic competitions

Arts

Exhibitions, performances, and galleries

Entertainment

Concerts, shows, and live events

Lifestyle

Wellness, food, and personal growth

Made with GAMMA

Team Members

EnjoyEvents was designed and developed by a team of **6 members**, each contributing to the project's success.

ID	Name	Role
A24126510151	Palavalasa Srivalli	Team Member
A24126510152	Patnaikuni Adarsh	**Project Lead & UI/UX Designer**
A24126510153	Peddada Jasmine Ratna	Team Member
A24126510154	Pentakota Deshik	Team Member
A24126510155	Pitchala Srinivasula Reddy	Team Member
A24126510269	Panithi Harshavardhan	Team Member

Design Tool

Figma

The industry-leading interface design and prototyping tool used to bring EnjoyEvents to life — from wireframes to high-fidelity interactive prototypes.

Why Figma?

- **Real-time collaboration** across all 6 team members simultaneously
- **Component libraries** for consistent UI elements and variants
- **Prototyping & interactions** built directly within the design file
- **Auto-layout** for responsive and adaptive screen designs

Made with GAMMA

Key Features & Design Process

Key Features

- **User Authentication** — Login, Sign-up, OTP
- **Event Browsing** by 5+ categories
- **Booking System** with payment confirmation
- **My Events Section**
- **Notifications**
- **Calendar Integration**
- **User Profile Management**

Design Process — 7 Phases

01

Requirement Study & Planning

02

Wireframing (low-fidelity sketches)

03

High-Fidelity UI Design

04

Components & Variants Creation

05

Prototyping & Interactions

06

Testing & Iteration

07

Final Submission

Made with GAMMA

Color Palette

The EnjoyEvents color system is carefully crafted to evoke warmth, creativity, and clarity across all screens.

Color Name	Hex Code	Usage
Orchid Pink	#DA70D6	Buttons, highlights
Soft Beige	#F5F5DC	Backgrounds
Deep Purple	#6A0DAD	Headers, icons
Light Cream	#FFF5E1	Warm screens
Charcoal	#333333	Primary text
Emerald Green	#4CAF50	Success messages

Typography

EnjoyEvents uses **Poppins** and **Montserrat** as its primary typefaces — modern, clean, and highly legible on mobile screens.

Headings

Poppins / Montserrat Bold

24–32px

Used for screen titles and primary labels

Subheadings

Poppins / Montserrat Medium

18–22px

Used for section headers and card titles

Body

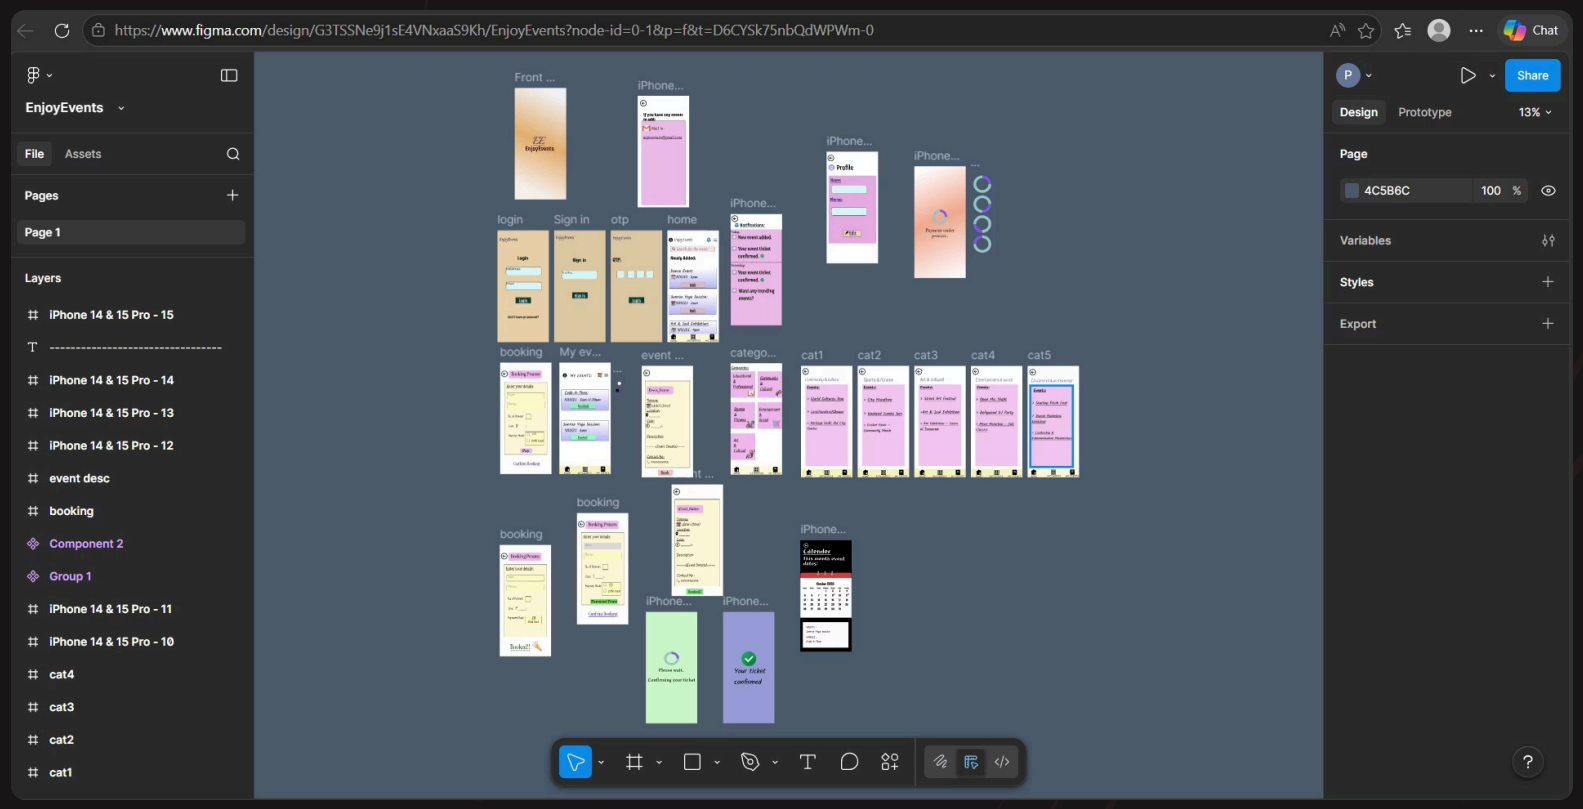
Poppins / Montserrat Regular

14–16px

Used for descriptions, labels, and general content

Made with GAMMA

Screens Included



The EnjoyEvents app covers a comprehensive set of screens to deliver a complete end-to-end user experience.

- Splash Screen
- Login / Welcome
- Dashboard / Home
- Categories
- Event Details
- Booking Process
- Payment Process
- My Events
- Calendar
- Notifications
- Profile

Animations Used

EnjoyEvents leverages Figma's powerful animation capabilities to create a fluid, engaging, and polished user experience across all screens.

Smart Animate

Smooth transitions between matching layers for seamless screen-to-screen navigation

Slide-in

Panels and modals slide into view for intuitive directional navigation

Dissolve

Gentle cross-fade between screens for soft, elegant transitions

Fade-in

Elements appear gradually, reducing visual shock and improving readability

Scale-in

Components grow into place, adding depth and a sense of interactivity

Made with GAMMA

Auto-Layout & Responsive Design

EnjoyEvents is built on a robust responsive framework ensuring pixel-perfect consistency across all supported devices.

Grid & Spacing System

- **8pt grid system** for consistent spatial rhythm
- **16px padding** for comfortable content breathing room
- **12px card radius** for soft, modern card aesthetics
- **8px button radius** for clean, tappable button shapes

Responsive Targets

Uses **constraints and flexible layouts** to adapt seamlessly across:

📱 iPhone 14

390 × 844px

📱 iPhone 15 Pro

393 × 852px

📟 Tablets

Adaptive multi-column layouts
